**Subject:** RE: QUESTION: B. Braun EtO Scripts/Slides

Hi Karen – I think it makes sense to talk about planned controls. However, it still probably makes sense to talk about the distance aspect of the risk so I would recommend a slide that illustrates that the risk is depended on how close you are to the facility.

Adding Madeline to see what her thoughts are on the slides.

**Subject:** QUESTION: B. Braun EtO Scripts/Slides

Hi Taylor,

I am working on the slides and scripts for the R3 EtO facilities.

For the B. Braun facility – since there is no website for the facility and no map for the community to look at – what do you suggest we focus on when it comes to the slide that talks to the isopleth map? Would you like for us to include a paragraph on the installation of controls, when it occurred, when the stack test was done, the results of the stack test, etc.? Please advise.

Thanks,  
Karen
